Control of Asian Citrus Psyllid Nymphs

7 Trials, Florida, 2008-11

Danitol is a federally Restricted Use Pesticide.

Independent trials from 2008-2011 measured control of Asian citrus psyllid nymphs by Closer™ SC insecticide and other popular insecticides through 33 days after application (DAA).

Control of Brown Citrus Aphid

Deland, Fla., 2011

Lorsban Advanced is a federally Restricted Use Pesticide.

Trials in 2011 measured control of all stages of brown citrus aphid through 19 days after application (DAA). Results showed Closer™ SC insecticide provided quick-acting and excellent residual control with or without crop oil.
Control of Citrus Mealybug

Florida, 2008

A trial measured the number of mealybug crawlers per fruit at four, seven, 14 and 21 days after application (DAA), comparing Closer™ SC insecticide with Lorsban® Advanced insecticide. Results showed Closer provided excellent knockdown and residual control of mealybug. The addition of oil with 5.7 oz./A of Closer provided the best control throughout the 21-day trial.

Control of Citrus Snow Scale

Jupiter, Fla., 2010

A trial measured residual control of Closer™ SC insecticide and two other popular insecticides through 77 days after application (DAA). Results showed the recommended rate provided consistent control of citrus snow scale.

Lorsban Advanced is a federally Restricted Use Pesticide.

Lorsban-4E is a federally Restricted Use Pesticide.
