Dow AgroSciences

2,4-DB Herbicide

Controls broadleaf weeds in lucerne and new pastures

READ THE LABEL COMPLETELY BEFORE MIXING OR APPLYING

ACTIVE INGREDIENT:
Contains 400 g/litre 2,4-DB as the sodium salt in the form of a soluble concentrate.

GROUP 01 HERBICIDE

WARNING:
HARMFUL & CORROSIVE - Keep out of reach of children
ECOTOXIC

™ Trademark of The Dow Chemical Company (“Dow”) or an affiliated company of Dow

CONTENTS: 20 Litres
HAZARD CLASSIFICATION
6.1D, 6.3A, 6.5B, 6.9A, 8.3A, 9.1C, 9.2A, 9.3C, 9.4C

APPROVED HANDLER
This product must be under the personal control of an approved handler when:
a) applied in a wide dispersive manner; or
b) used by a commercial contractor.

RECORD KEEPING
Records of use, as described in relevant HSNO regulations and The New Zealand Standard for the Management of Agrichemicals (NZS8409), must be kept if more than 3L of 2,4-DB Herbicide is applied or discharged within 24 hours in a place where members of the public may be present or where the substance may enter air or water and leave the place.

TOXICITY
THIS PRODUCT IS CORROSIVE TO THE EYES AND MAY CAUSE EYE DAMAGE. MAY CAUSE SKIN IRRITATION. MAY CAUSE SENSITISATION FROM PROLONGED SKIN CONTACT. MAY CAUSE ORGAN DAMAGE FROM REPEATED ORAL EXPOSURE AT HIGH DOSES. Avoid contact with eyes and skin. Do not eat, drink or smoke while using. Remove protective clothing immediately after handling this product and wash hands and face before meals and after work.

ECOTOXICITY
HARMFUL TO TERRESTRIAL VERTEBRATES AND INVERTEBRATES. HARMFUL TO AQUATIC ORGANISMS. Do not contaminate an aquatic environment with chemical or empty container. Do not spray or allow drift off target.

SELECTIVE HERBICIDE - VERY TOXIC TO SOME PLANT SPECIES. Some plants may be damaged or killed by contact with this product. Do not allow drift outside the target area to occur. Decontaminate equipment before use on sensitive plants (see Application Methods section).

HANDLING PRECAUTIONS

EQUIPMENT
Apply using accurately calibrated and maintained equipment in accordance with The New Zealand Standard for the Management of Agrichemicals (NZS8409).

Flush equipment thoroughly with clean water after use according to Cleaning Spray Equipment instructions below. Dispose of cleaning water according to the disposal instructions below.

STORAGE
Store in the original container tightly closed and in a locked, dry, cool, well ventilated area, well away from ignition sources and foodstuffs.

Storage must be generally in accordance with The New Zealand Standard for the Management of Agrichemicals (NZS8409). Stores containing 100L or more of 2,4-DB Herbicide are subject to signage, and those containing 1000L or more require bunding. See the Hazardous Substances Emergency Management and Identification Regulations and The New Zealand Standard for the Management of Agrichemicals (NZS8409) for further information.

PERSONAL PROTECTION
When mixing or applying wear eye protection, chemical resistant and waterproof gloves made of material such as polyethylene or polyvinyl chloride, chemical resistant boots, cotton overalls buttoned to the neck and wrist and a washable hat.
**SPILLS AND DISPOSAL**

Do not touch or walk through spilled material. Wear a face shield or goggles, overalls buttoned to neck and wrist, chemical resistant gloves and footwear. Stop leak when safe to do so. Dam area and prevent entry into waterways, and drains. **Small spills/leaks:** Absorb with proprietary absorbent suitable for chemical spills or inert material such as sand, soil or sawdust. Collect spilled product and place in sealable container for disposal. Spill residues may be cleaned using water and detergent. Contain and absorb wash water for disposal. Absorb and collect washings and place in the same sealable container for disposal. **Large spills/leaks:** Dam the area and report large spills to Dow AgroSciences Emergency Services at 0800 844 855.

Triple rinse empty container and add rinsate to spray tank. Triple rinsed containers containing the Agrecovery logo on the label and that are free of all residues (liquid and dry) and have an intact legible label should be taken to an Agrecovery collection site. Otherwise crush or puncture and bury in a suitably approved landfill. Do not burn empty containers.

Dispose of the product only by using according to the label, via Agrecovery (visit www.agrecovery.co.nz or call 0800 AGRECOVERY (247 326) for information about the type and quantity of chemical acceptable for disposal), or at an approved landfill or at an approved landfill. Do not burn.

Dispose of equipment cleaning water onto ground away from susceptible crops and plants.

Do not dispose of this product; spray mix or equipment cleaning water down drains or sewers.

**FIRST AID**

If swallowed do not induce vomiting. For advice contact the National Poisons Centre 0800 POISON (0800 764 766) or a doctor immediately. If splashed in eyes, wash out immediately with water. If skin or hair contact occurs, remove contaminated clothing and wash skin and hair with soap and water.

**TRANSPORT**

Do not carry on a passenger service vehicle.

**SAFETY DATA SHEET**

A Safety Data Sheet is available from Dow AgroSciences on request. Call Customer Service Toll Free on 0800 803 939 or visit www.dowagrosciences.co.nz.
NOTICE

**Important:** You must read the warning and conditions given on this label. If they are not acceptable, or if you are in doubt as to the proper handling of this product (including its transport, storage, use, disposal, and requirements for approved handlers [if applicable]) then return the unopened product to the supplier at once.

**Warning:** This product is subject to controls and could be hazardous if handled incorrectly. The user is responsible for ensuring that the handling of this product is in accordance with the law (including the Hazardous Substances and New Organisms Act 1996 and the Agricultural Compounds and Veterinary Medicines Act 1997) and with the directions provided. The Registrant declines all liability (whether in contract, tort (including but not limited to negligence), or otherwise) to the maximum extent permitted by law in relation to the handling of this product in a manner which is contrary to the directions given or to any applicable Acts, Regulations or Guidelines.

**Further information** regarding the applicable Acts, Regulations and Guidelines for the proper handling of this product may be obtained by contacting EPA New Zealand (www.epa.govt.nz) or the Ministry for Primary Industries (MPI) (www.foodsafety.govt.nz).

This product is warranted to contain the specified active ingredients within accepted analytical tolerance when packed.

Registerd pursuant to the ACVM Act 1997, No P00179. See www.foodsafety.govt.nz for registration conditions.

Approved pursuant to HSNO Act 1996, EPA Approval Code HSR000361. See www.epa.govt.nz for approval controls.

2,4-DB Herbicide 081015
ANIMAL SAFETY
Poisonous plants (including but not limited to ragwort, tutu) may become more palatable after spraying. If concerned that stock may be affected, stock should be kept away from the area until the plants have died down.

APPLICATION METHODS

2,4-DB Herbicide can be applied using conventional ground or aircraft spraying equipment. Flush equipment thoroughly with clean water after use. **Decontaminate before using on plants that are sensitive to 2,4-DB Herbicide.** Crops susceptible to 2,4-DB Herbicide include, but are not limited to: all brassicas, beans, flowers, fruit trees, lupins, ornamentals, potatoes, shade trees, squash, sunflowers, tomatoes, vegetables, and vine crops.

**Boom spraying:** Use 100 - 200 L/ha water applied with at least a medium spray droplet size category as defined by the BCPC or the ASABE (S572). **To minimise off-target drift do not apply** when wind speed is less than 3 or more than 20 kilometres per hour as measured at the application site and do not apply during surface temperature inversion conditions at the application site.

For difficult-to-control perennial pasture weeds use 300 L/ha water to obtain more complete coverage.

**Aerial spraying:** Use 60-100 L/ha water applied with at least a coarse spray droplet size category as defined by BCPC and ASABE (S572). **To minimise off-target drift do not apply** when wind speed is less than 3 or more than 20 kilometres per hour as measured at the application site and do not apply during surface temperature inversion conditions at the application site. Flush equipment thoroughly with clean water after use.

**IMPORTANT:** In order to select the appropriate nozzles for the required spray quality and to operate the equipment to minimize spray drift, this product must be applied in accordance with The New Zealand Standard for the Management of Agrichemicals (NZS8409).

**MIXING:**
Pour the measured quantity of 2,4-DB Herbicide into the partly filled spray tank and add the remainder of the water. Agitate thoroughly during filling.

**Cleaning spray equipment:**

**Rinsing**
After using 2,4-DB Herbicide:
- Empty the spray tank completely and drain the whole system. Thoroughly wash inside the unit using a pressure hose. Drain spray unit and clean any filters in the tank, pump, lines, hoses and nozzles.
- After cleaning the spray unit as above, quarter fill with clean water and circulate the water through the pump, lines, hoses and nozzles. Drain and repeat the rinsing procedure twice.
- Discard rinse water on land already sprayed or on wasteland away from desirable plants and water sources.

**Decontamination**
Before using equipment with other products sensitive to 2,4-DB Herbicide:
- Wash the tank and rinse the system as above, then quarter fill the tank and add a standard alkali based laundry detergent at 500g (or mL)/100L of water and circulate through the system for at least 15 minutes. If using a concentrated laundry detergent use 250 g (or mL)/100L of water. Do not use chlorine based cleaners.
Drain the whole system. Remove filters and nozzles and clean them separately.

Finally, flush the system with clean water and allow to drain.

Cleaning water should be discharged onto a designated disposal area, or onto unused land away from desirable plants and water sources.

WITHHOLDING PERIODS
It is an offence for users of this product to cause residues exceeding the relevant MRL in the New Zealand (Maximum Residues Limits of Agricultural Compounds) Food Standards.

Except for animal safety reasons no withholding period is required when used as directed.

RESISTANCE MANAGEMENT

2,4-DB Herbicide is a phenoxy carboxylic-acid herbicide (Group O1). Some naturally occurring individual weeds may become resistant when excessive use of the same herbicide occurs. To maximize the effectiveness of herbicides, products containing alternate modes of action should be used in the spray program. Consult http://resistance.nzpps.org/ for alternate modes of action and the details of resistance management strategies (if any) for the crops listed on the label.

DIRECTIONS FOR USE:

2,4-DB Herbicide is recommended for selectively controlling broadleaf weeds in new pastures and lucerne. Red clover crops should be sprayed with MCPB Herbicide.

Avoid application prior to expected heavy rain.

2,4-DB Herbicide should be applied as soon as young clovers or young lucerne have developed one and preferably two trifoliate leaves. Where more than 50% bare ground is exposed the spraying should be delayed until the vegetation provides a more complete cover, to reduce the possibilities of root absorption. Weeds should be small and actively growing at treatment. Established lucerne stands can be sprayed but some crop suppression may occur. Heavy grazing prior to spraying will minimise damage.

WEEDS CONTROLLED:
