## WHY USE DELEGATE?

- Excellent control of spotted wing drosophila, oblique-banded leafroller
- Trusted and proven control of a broad range of insects
- Unique mode of action provides smart rotational options
- Works two ways – on contact and by ingestion – for quick knockdown and residual activity

**Delegate™**  
INSECTICIDE

Group 5

## WHY USE CLOSER?

- Extremely fast-acting control of black cherry aphid
- No cross-resistance with other insecticides
- Good fit in an IPM program
- Low use rate with superior control
- New class of chemistry – sulfoximines
- Soft on beneficials
- Strong residual activity
- Controls by both contact and ingestion
- Xylem systemic – moves chemistry to the growing tips of the plant

**Closer™**  
INSECTICIDE

Group 4C

## WHY USE QUINTEC?

- Trusted powdery mildew control
- Unique mode of action – moves into vapour phase to protect in and around bunches of fruit
- Surface mobility ensures excellent redistribution on leaves and fruit
- Strong residual activity
- Group 13 fungicide, making it an excellent rotational product with other fungicide classes
- A key part of an IPM program
- The only fungicide in this class of chemistry

**Quintec™**  
FUNGICIDE

Group 13
