

FILMTEC Membranes

Handling, Preservation and Storage: Used FILMTEC Elements

Shipping Used FILMTEC Elements

When FILMTEC™ elements have to be shipped, they must be preserved with a preservation solution according to [Preservation and storage of used FILMTEC elements \(Section 7.3.1\)](#).

Make sure that:

- The plastic bag does not leak.
- The element is properly identified.
- The preservation solution is correctly labelled.

We recommend using the original packaging with the original polystyrene foam cushions to protect the element from mechanical damage. Elements with non flush-cut product water tubes should be protected against damage to the product water tube ends.

The membrane elements will not be damaged by freezing temperatures during shipping provided the elements are thawed before loading and use.

FILMTEC Membranes
