THERMAX™ Metal Building Board

1. PRODUCT NAME
THERMAX™ Metal Building Board

2. MANUFACTURER
The Dow Chemical Company
Dow Building Solutions
200 Larkin Midland, MI 48674
1-866-583-BLUE (2583)
Fax 1-989-832-1465
www.dowbuildingsolutions.com

3. PRODUCT DESCRIPTION
THERMAX™ Metal Building Board consists of a polyisocyanurate foam core with 1.25 mil embossed aluminum facers on both sides. THERMAX™ Metal Building Board has a Sound Transmission Classification (STC) of 15. And, it can be installed exposed to the interior without a thermal barrier.

THERMAX™ Metal Building Board offers high long-term R-value. Used in conjunction with a polyisocyanurate foam core with 1.25 mil embossed aluminum facers on both sides. THERMAX™ Metal Building Board has a Sound Transmission Classification (STC) of 15. And, it can be installed exposed to the interior without a thermal barrier.

Basic Use
THERMAX™ Metal Building Board provides both insulation value and an interior finish system for walls in metal buildings. The boards also find application in standing seam metal roofs. THERMAX™ Metal Building Board is listed in 1, 2, 3 and 4 hour UL fire rated wall assemblies.

4. TECHNICAL DATA

Applicable Standards
THERMAX™ Metal Building Board meets ASTM C1289 – Standard Specification for Faced Rigid Cellular Polyisocyanurate Thermal Insulation Board, Type I, Class 2. Applicable standards include:
• C203 – Standard Test Methods for Breaking Load and Flexural Properties of Block-Type Thermal Insulation
• C209 – Standard Test Methods for Cellulosic Fiber Insulating Board
• D1621 – Standard Test Method for Compressive Properties of Rigid Cellular Plastics
• D2126 – Standard Test Method for Response of Rigid Cellular Plastics to Thermal and Humid Aging
• E96 – Standard Test Method for Water Vapor Transmission of Materials
• D1623 – Standard Test Method for Tensile and Tensile Adhesion Properties of Rigid Cellular Plastics

Physical Properties
THERMAX™ Metal Building Board exhibits the typical physical properties and characteristics indicated in Table 2 when tested as represented.

Environmental Data
THERMAX™ Metal Building Board is manufactured with a zero ozone depleting potential. The use of THERMAX™ Metal Building Board helps reduce the carbon footprint of commercial buildings.

Fire Protection
THERMAX™ products should be used only in strict accordance with product application instructions. THERMAX™ products, when used in a building containing combustible materials, may contribute to the spread of fire. For more information, consult MSDS and/or call Dow at 1-866-583-BLUE (2583). In an emergency, call 1-989-636-4400.

Code Compliances
THERMAX™ Metal Building Board complies with the following codes:
• 2009 International Residential Code (IRC) Section 316
• 2009 International Building Code (IBC) Section 2603
• ICC-ES ESR-1659
• FM 4880 – Wall-Ceiling Construction Metal-Faced – Class 1 Fire Rated to Max. 30’ Exposure High, 4.25” Thick, 4’ Wide, When Installed as Described in the Current Edition of FMRC Approval Guide
• THERMAX™ products are covered under Underwriters Laboratories Inc. (UL) file R5622
• UL 1256 – Fire Test of Roof Deck Constructions, Roof Deck Construction No. 120 and No. 123
• UL 723 (ASTM E84) Surface Burning Characteristics of Building Materials
• The following designs are 1, 2, 3 or 4 hour wall rated assemblies as listed in the UL Fire Resistance Directory: U026, U326, U330, U354, U355, U424, U425, U460, U902, U904, U905, U906, U907, V454, V482, V499
• FMVSS No. 302 – Flammability of Interior Materials – Passenger Cars, Multipurpose Passenger Vehicles, Trucks and Buses (Docket No. 3-3; Notice 4)

Contact your Dow sales representative or local authorities for state and local building code requirements and related acceptances.

(1) Contact your Dow seller for information at different R-values and other sizes and lead time requirements. Not all product sizes are available in all regions.
(2) R-value means resistance to heat flow. The higher the R-value the greater the insulating power. Stabilized R-value @75°F mean temperature determined in accordance with ASTM C518, R-values expressed in ft2•h•°F/Btu.
5. INSTALLATION
THERMAX™ Metal Building Boards are lightweight and can be sawed or cut with a knife. They install quickly to walls (girts, steel stud, tilt-up, block, wood) and ceilings – inside and outside of purlins, trusses or bar joints. Butt joints must be installed over structural members. The surface of the insulation at all joints must be continuously sealed with tape or with one of Dow’s joint closure systems.

Contact a local Dow representative or access the literature library at www.dowbuildingsolutions.com for more specific instructions.

6. AVAILABILITY
THERMAX™ Metal Building Board is manufactured in several locations and is distributed through an extensive network. For more information, call 1-800-232-2436.

(1) Vertical compressive strength is measured at 10 percent deformation or at yield, whichever occurs first.

7. WARRANTY
Fifteen-year limited thermal warranty is available. Contact your Dow representative for details.

8. MAINTENANCE
Not applicable.

9. TECHNICAL SERVICES
Dow can provide technical information to help address questions when using THERMAX™ Metal Building Board. Technical personnel are available to assist with any insulation project. Call 1-866-583-BLUE (2583).
